Understanding Communication Infrastructure Challenges

Thanks to advancements in technology, city residents are now using mobile phones more than ever before. Mobile wireless providers are having to adapt and grow their wireless infrastructure to account for increased customer demands, 5G to enable “Smart Cities” and other new technologies. Now that more people use smartphones to stream videos and surf the web, wireless carriers want to put additional lower-power antennas closer to the ground so that fewer people will connect to each one, resulting in
less network congestion. Local governments are now faced with regulating how and where additional communication infrastructure is installed, while balancing industry needs and city residents’ aesthetic and safety concerns.

Moderator: Gary Resnick, Mayor, City of Wilton Manors
Speakers: Thomas Cloud, City Attorney, Fort Meade, Polk City and Wauchula, and President, Florida Municipal Attorneys Association; Tracy Hatch, General Attorney, AT&T; and Sandro Racine, System Performance Manager, Verizon Wireless

Come learn more about this important issue and how it could impact local government revenues.
