WHY THE FLORIDA LEAGUE OF CITIES TELECOM COST REDUCTION PROGRAM?

Comprehensive Review. Our team works with your IT department to provide a complete review and analysis of your city's current telecom situation/network to identify cost-saving opportunities. This review includes all service configurations, network designs and deployments. We provide a detailed audit of all telecom services billing statements and any associated contracts.

Extension Of Staff. Our team of experts has extensive knowledge of the telecom field from a combined 65-plus years of experience directly working in the telecom industry. Our team also has extensive experience working with municipal IT departments to implement cost-saving options together.

No Upfront Costs. The analysis costs the city nothing unless the recommendations are accepted by the city and result in lowered costs/savings for the city.

Proven Success. Our team has worked with more than 40 municipalities, both large and small, resulting in significant refunds, lower monthly charges and contract re-negotiations, and achieving substantial cost savings for the cities.
